Weathered Walls™
Hand-Painted in Chicago

Joyce Romanoff
Maya Romanoff CEO

My husband and Company Founder, Maya Romanoff, dedicated his life to pioneering and redefining the wallcovering industry. Maya instilled a deep respect for material balanced with a lawless sense of play.

Today, our skilled artisans continue to produce stunning collections using dyes, glass beads, gold leaf, capiz shells, metals, wood, cork, fabrics and more. We cherish Maya's simple guiding principle, "It's got to be beautiful."

In this past year we opened our new Chicago Showroom, located in our Skokie, Illinois headquarters. It's a one-of-a-kind, immersive experience, where designers can shop for wallcoverings, meet in-person with our incredible design team and take a tour of our Production Studio to see first-hand how we make wallcoverings. I welcome anyone—*anytime*—to pay a visit!

We've expanded our collections with more Type II vinyls and breathtaking, sustainable hand-inlaid cork. We've also rolled out certified IMO solutions to meet the needs of the cruise industry. It's been an amazing year. **Be prepared to be inspired—2023 promises to be stellar!**

I am grateful for my family and our artisans who continue to carry on Maya's legacy every day, and I value each of our clients and friends who appreciate the passion and beauty in the work we do.

SUSTAINABILITY

OUR MISSION

Maya's long standing commitment to Eastern philosophy has greatly influenced our company's respect for materials. We produce many of our wallcoverings by hand in our Chicago studio and consequently have great control over what goes into the products we sell, and how our employees are treated.

Maya Romanoff strives to use natural and sustainable materials, work only with factories that are clean and treat their workers fairly, and purchase materials from local sources when possible.

PEOPLE

We are proud to provide our employees with a safe, clean and beautiful working environment, where artisanal craftsmanship can truly shine.

Several of our mills are situated in impoverished areas of the world, and we recognize our responsibility to provide a livelihood to these artisans, their families and their communities.

A percentage of sales from numerous collections are donated to organizations such as DIFFA's Specify with Care program.

PRODUCT

Wherever possible we source goods and services indigenous to the relevant manufacturing locale.

Over 50% of our products are manufactured or finished in the USA, including top-selling collections Ajiro® Wood Veneer, Beadazzled Flexible Glass Bead Wallcovering,® Mother of Pearl™ Wall Tiles, Weathered Walls™ and Maya Romanoff 54™ Type II vinyl.

We continually seek ways to minimize the excessive use of packing materials and reduce our manufacturing carbon footprint.

PROCESS

Our manufacturing techniques produce very little effluent. We use water based colorants, adhesives and finishes. In our Chicago studio, water-based effluents undergo a three step filtration process resulting in non-hazardous wastewater; solids extracted from wastewater are non-hazardous and disposed of responsibly.

We use the minimum amount of material to produce maximum effect: our genuine sea shells, metals, wood veneers, and mica wallcoverings are constructed from the thinnest possible layers. As such, they have long been considered green alternatives to their traditional, bulkier counterparts.

Digital Printing

Choose from a variety of substrates for printing—Type II vinyl, non-woven, grass-cloth, metallic mylar, Ajiro® wood veneer and more! MAYA's Atelier team will create a design that exceeds your expectations. Our in-house digital studio allows for low minimums, quick turnarounds, competitive pricing and beautiful results!

Colorations

MAYA's Chicago Studio can custom color many of our in-line handcrafted wallcoverings with small minimums and quick turnaround times. A luxurious look—perfectly colored to work with your space!

Cozy™ Executions

An innovative printing technology is used to apply dimensional texture on a luxurious heathered wool fabric. Choose from our standard colored fabrics, ink colors and patterns to create a unique combination!

Ajiro® Executions

Hand-inlaid, ultra-thin wood veneer patterns can be die-cut or laser-cut, depending on the intricacy of the design. Create a custom stained color to match your furniture or moldings, design a new pattern, or combine wood with a foil background (as pictured) to create an original luxe experience.

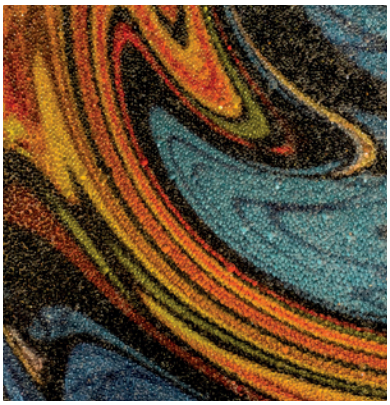

Vinyl

Most of our classic wallcoverings can be reinterpreted in high-performance Type I, Type II, or Type III vinyl, using non-woven or Osnaburg backings. Additionally, we can create a completely branded experience for your large-volume projects, all within your budget (minimum order 500 yards).

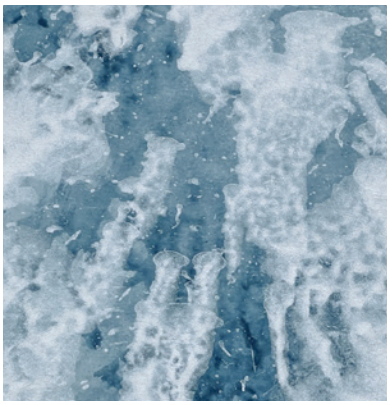

Screen-Printing

MAYA's state-of-the-art, large format silk screen press prints up to 52" x 148," making possible large-scale repeats of your original designs. Our press can handle a variety of substrates, using specialty inks and processes to achieve breathtaking effects and textures.

Beadazzled™ Murals

Bring MAYA your inspiration, and our Atelier team will execute a design that is customized to your specifications! We will digitally print the image and flock any of our glass-beading styles to make your piece a true work-of-art. Your Beadazzled™ masterpiece can be installed as wallcovering mural or as framed art. The possibilities are endless!

Handcraft

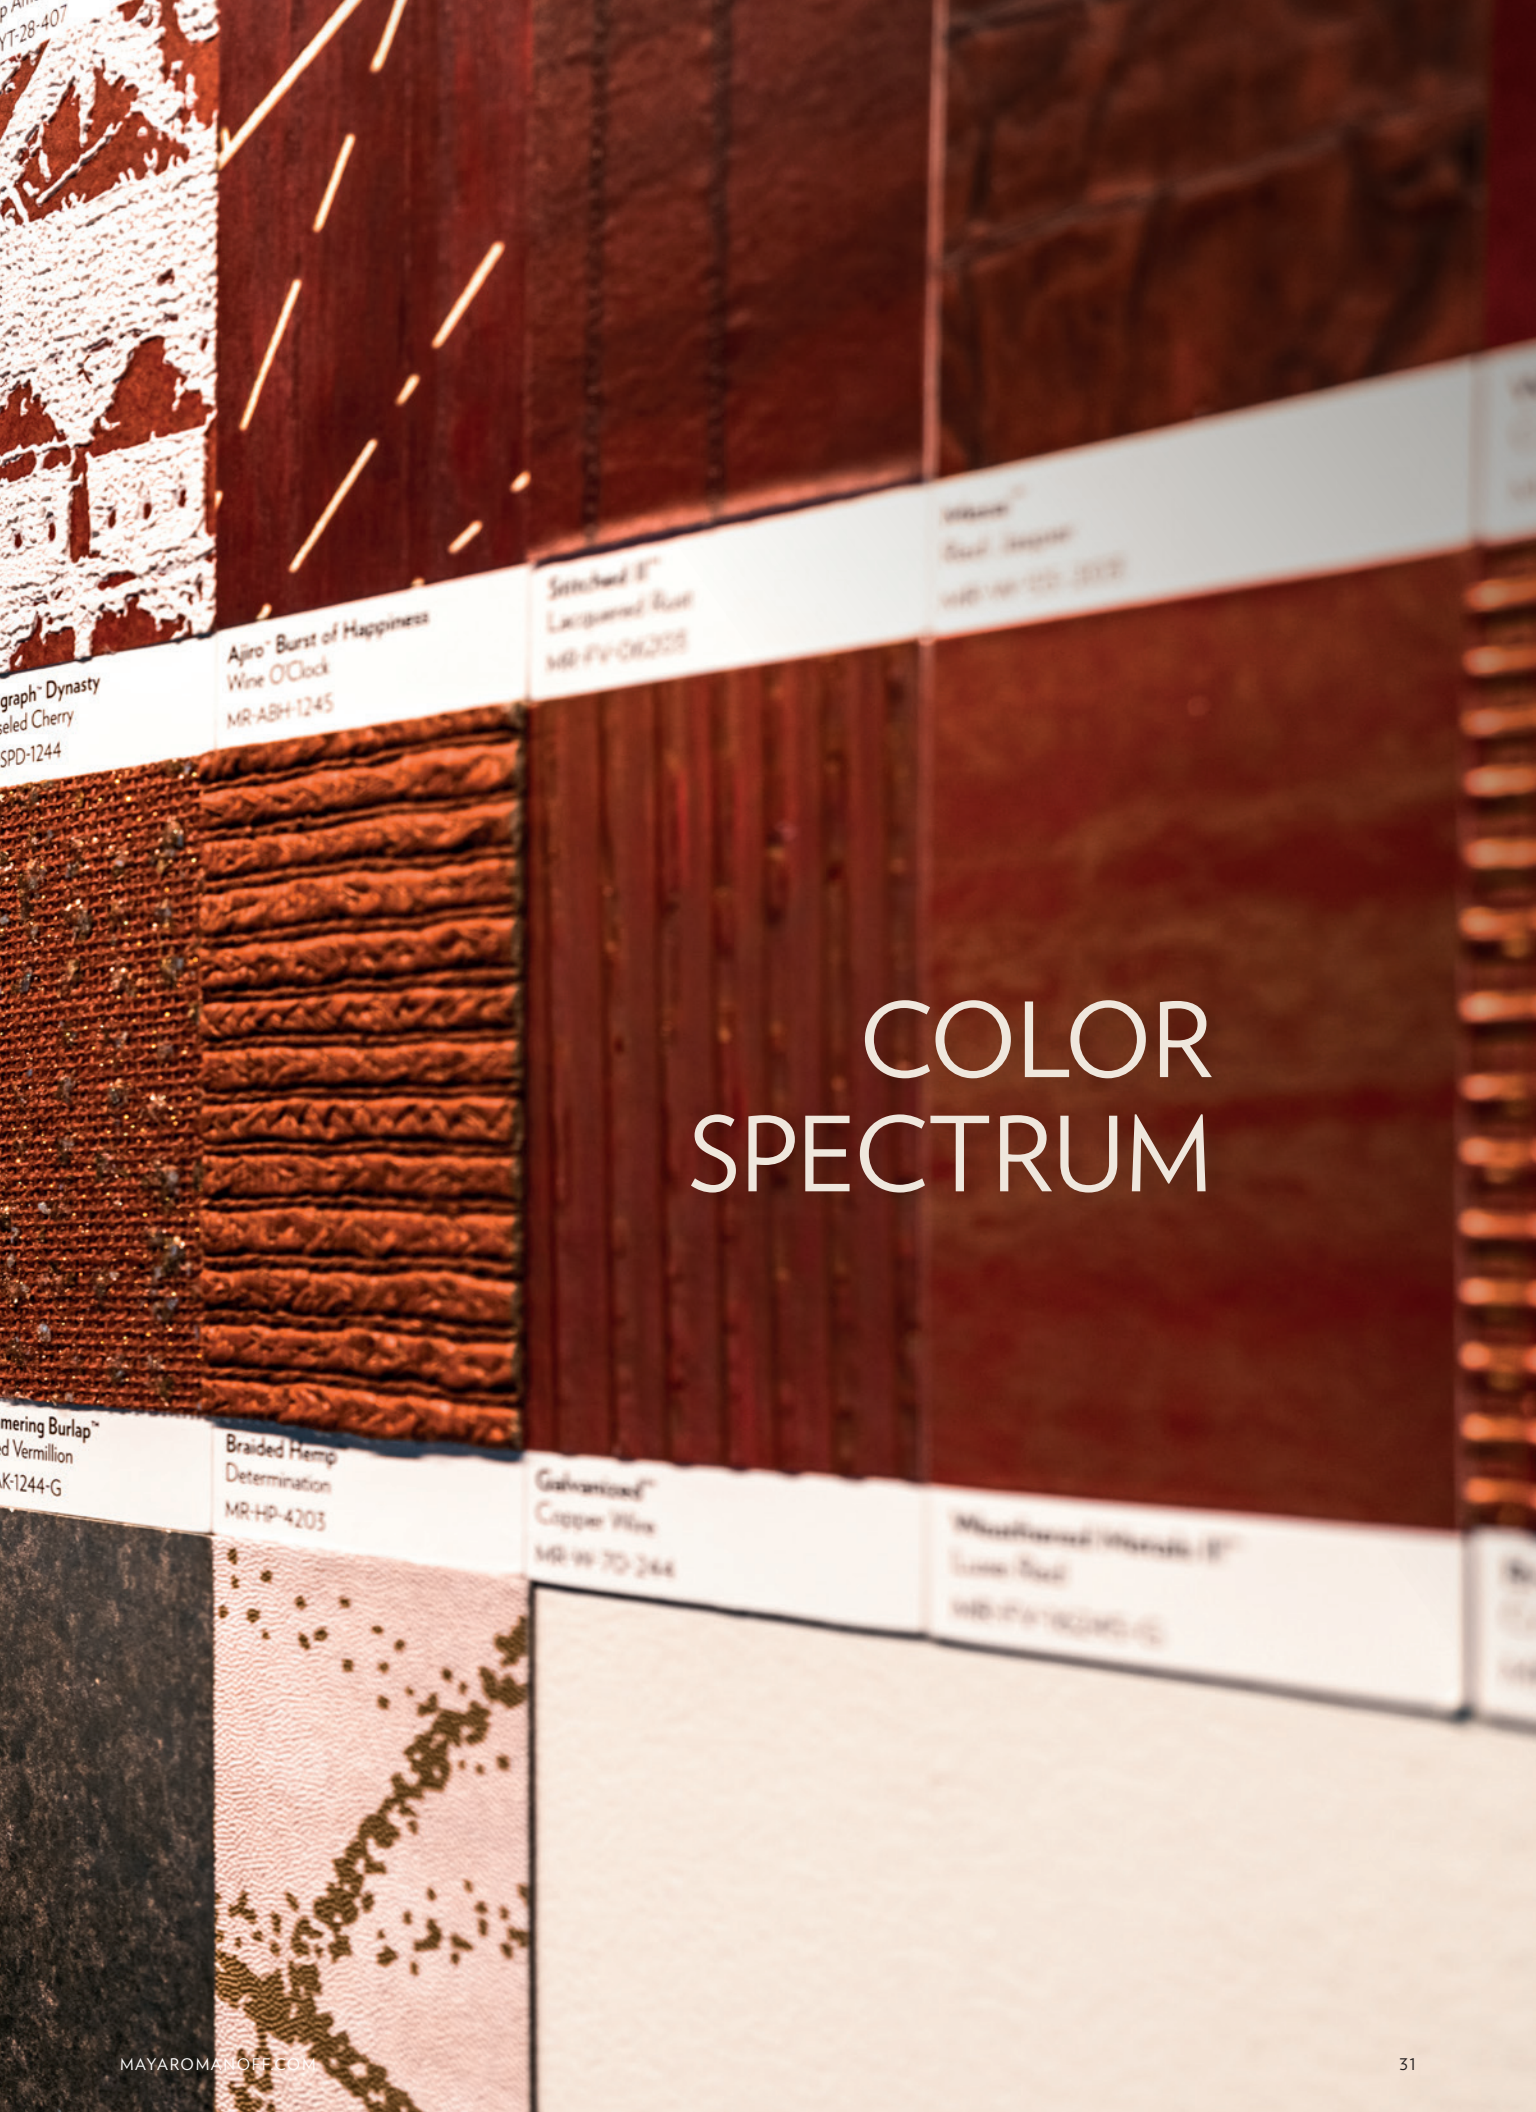

Our Chicago-based Studio is staffed with talented artisans. Whether you wish to replicate a surface such as marble, concrete, or limestone, or create a unique surface all together, MAYA has the experience and resources to execute a finish that can be consistently produced and beautifully installed—for the ultimate WOW!

This wallcovering presents a dimensional effect that is created through the troweling of a dense compound of our own creation. Based on the elemental simplicity of a vertical line, matte and metallic layers combine to create an aged patina that begs to be touched. Handcrafted in our Chicago Studio.

Mesa™ in Golden Quartzite

An extremely intensive process involving several steps of handcraft, Mesa is inspired by Japanese crushing techniques and the interaction of dye with the peaks and valleys of the paper. The new realization has a suede-like color palette with a matte, contemporary finish.

Shimmering Burlap™

Hand-Painted Burlap Flocked with Mica *Andre Kikoski for Maya Romanoff*

Shimmering Burlap in Golden Ecru

Renowned Architect Andre Kikoski found his inspiration in the beauty of natural jute, transforming rough burlap into a luxury surfacing material. The result is Shimmering Burlap, an unexpected juxtaposition of coarse jute and reflective silica mica. Multiple layers of mica are flocked onto hand-painted burlap, creating a textural light play of fibers and minerals. Shimmering Burlap lends beauty and elegance to any of your exquisitely designed spaces.
