

# CARE, CLEANING & DISINFECTING GUIDE

MAYA ROMANOFF

## MAINTENANCE TIPS

*Proper care and routine maintenance of your wallcovering will help preserve its beauty.*

- Avoid direct or reflected sunlight. Our wallcoverings are not guaranteed against fading or color change.
- Maya Romanoff wallcoverings are formulated for dry-use areas.
- Before cleaning any wallcoverings, test first on a small, inconspicuous area.
- Avoid getting the wallcovering excessively wet.
- Never use abrasive cleansers or steel wool as they will mar the surface.
- Clean by blotting the soiled area with a soft, clean cloth, dampened with a mild solution of clear liquid detergent. Dry with a soft, clean cloth.
- Do not use harsh cleaners, solvents, or chemicals of any kind to clean Maya Romanoff products unless following the special guidelines below.

## SPECIAL CLEANING GUIDELINES

*When used as directed, disinfectant wipes and diluted bleach detergent/water solutions can be safe and effective sanitization methods on the majority of our wallcoverings.*

⚠ NOTE: Before proceeding with the process below, test first on a small, inconspicuous area to ensure there will be no damage to the wallcovering. When using disinfectant wipes, wipe gently; **Do not rub.**

1. Chloride bleach should always be diluted with water, and never be applied at full strength.
2. To properly dilute bleach for disinfecting wallcovering, mix 1 part bleach to 50 parts water (approx. 5 tablespoons of bleach to one gallon of water).
3. Make sure the wallcovering surface is free of loose dirt or dust.
4. With a soft, clean cloth, gently wipe the surface with the diluted bleach/water solution. **Do not rub.**
5. Make sure there is proper ventilation.
6. Allow solution one minute to set; then use a soft, clean cloth to carefully wipe down the surface. **Do not rub.** Allow time for air dry.

SEE THE **NEXT PAGE** FOR A COMPLETE LISTING OF OUR WALLCOVERINGS THAT CAN BE SANITIZED WITH DISINFECTING WIPES AND DILUTED BLEACH DETERGENT/WATER SOLUTIONS.
