Global Effects

Your passport to a whole new way of life.

MAYBE "OLD WORLD" GETS A BAD RAP. For us, the term brings to mind large-scale and ornate furniture, textiles in dark blues and reds, and religious paintings. Not that there's anything wrong with that. But for creative

director Jamie Laubhan-Oliver, it was important to change the definition. "I think it's simply a creative mix of things you love from all genres," she says. "You can mix African-inspired items with midcentury, traditional, modern,

and tons of metals." The trick is to not create too many focal points. "Be selective with your 'Wow' moments," she says.
