

SUSTAINABILITY

From design and materials to the people who craft our products, our philosophy centers on **Product, Process and People.**

MAYA ROMANOFF

PRODUCT

We focus on local sourcing and responsible production. Nearly 70% of our collections are made or finished in the USA. We're committed to careful use of resources, reducing waste and minimizing our carbon footprint.

PROCESS

Our methods use water-based colorants, adhesives, and finishes to lessen environmental impact. In our Chicago studio, a three-step filtration system ensures clean, non-hazardous wastewater. We create maximum effect with minimal material, for example, using thin layers of shell, metal, wood, and mica for sustainable beauty.

PEOPLE

We foster a safe, inspiring workplace where artisans can thrive. Many of our partner mills support local communities, and a portion of sales benefits organizations like DIFFA's Specify with Care program.

OUR MISSION

Rooted in Eastern philosophy, we value our materials, our makers, and our planet. By handcrafting many wallcoverings in Chicago and working in close collaboration with our mills around the world, we ensure every product reflects quality, fairness, and respect for the environment.

Recycled Content

Use of these materials may contribute to gaining LEED Materials & Resources Credit 4.1 or 4.2: Recycled Content.

Rapidly Renewable Material

Use of these materials may contribute to gaining LEED Materials & Resources Credit 6: Rapidly Renewable Materials.

Made in the USA

Product is manufactured in the United States.

Finished in the USA

Product is imported and then finishes are applied in the United States.

Heavy Metal-Free

Component materials are free of the following heavy metals: Antimony, Arsenic, Barium, Cadmium, Chromium, Lead, Mercury, and Selenium.

Formaldehyde-Free

Component materials are free of formaldehyde.

Installs well with low-VOC adhesive

When installed with Maya Romanoff recommended adhesive, use of these materials may contribute to gaining LEED Indoor Environmental Quality EQ Credit 4: Low-Emitting Materials.

LEED

Indoor Environmental Quality EQ Credit 4: Low-Emitting Materials
